

The Danish Centre for Strategic Research in Type 2 Diabetes - DD2

DD2 creates a bridge between research and treatment of type 2 diabetes patients. We collect blood, urine and data from people recently diagnosed with type 2 diabetes and make it available for diabetes research.

Our goal is to create a unique resource for research, ensuring the vision that in the future, everyone with type 2 diabetes will receive personalized treatment, recognizing that type 2 diabetes is a complex and diverse heterogeneous condition.

DD2 work to collect data that can create better treatments that reduce the risk of comorbidity and improve the quality of life for people with type 2 diabetes.

access unique data and
participate in the seminar

Help develop cohort-related research within the field of CMDs, while improving a unique Danish type 2 diabetes resource

What

Our purpose is to support the cardiometabolic research environment in the Nordic countries and enhance the use of data from Danish Center for Strategic Research in Type 2 Diabetes (DD2).

Your project leads to better understanding, treatment and prevention of Type 2 Diabetes complications, its interactions with other CMDs and improving the quality of life for people with Type 2 Diabetes. You can also use the DD2-data to study interactions such as increased risk of infections, cancer, mental disorders and health inequality.

Your areas may include

- genetic and epidemiological research
- registry studies focusing on long-term clinical event follow-up
- analysis of temporal changes in biomarkers
- medication use
- socioeconomic conditions
- diabetes complications

Your research activities must be anchored at a university, hospital or other non-profit research institution within the Nordic countries.

Who

You are an experienced researcher or early career researcher (senior PhD student or Postdoc).

Where

Submit your application through the Novo Nordisk Foundation's online application portal.

When

The call opens 29 August 2024 and closes 10 December 2024.

Facts

Grants

From DKK 1 to 5 million from the Novo Nordisk Foundation.

Duration

Projects lasting 1-3 years
Earliest start date is 1 August 2025.

Seminar

DD2 Research seminar

October 25 2024 at SDCC in Herlev from 12:00 to 17:00.
Signup at dd2.dk

Your generated data must flow back to the DD2 dataset
